

Buddy's Creature Report

A real-facts nature card

You will need: a grown-up to read with

No. 1 The Firefly

1. A firefly is not a fly at all. It is a little beetle.
2. Its glow makes light with almost no heat. People call it cold light.
3. Baby fireflies glow too, even before they can fly.
4. Each kind of firefly blinks its own special pattern, like a secret code.

Flitter is a firefly, just like these!

What would your blink pattern say?

Facts checked with the National Wildlife Federation wildlife guide.

Collect them all - a new creature lands every so often. Ages 3-7.
